| <i>Joud Majed Alahmadi</i> | 2218186 |
| <i>Supervisor : Dr. Alaa Badwylan</i> | |

STAGE 3

DESCRIPTION

The idea of our project is to create a cinema management system that helps the user choose the appropriate movie for him, choose his favorite category and seats, and choose the snacks he likes in an easy and effective way.

The project will contain:

Registration window: This window will ask the user to enter the username and password to log in to the system.

Menu window: This window will contain three main sections:

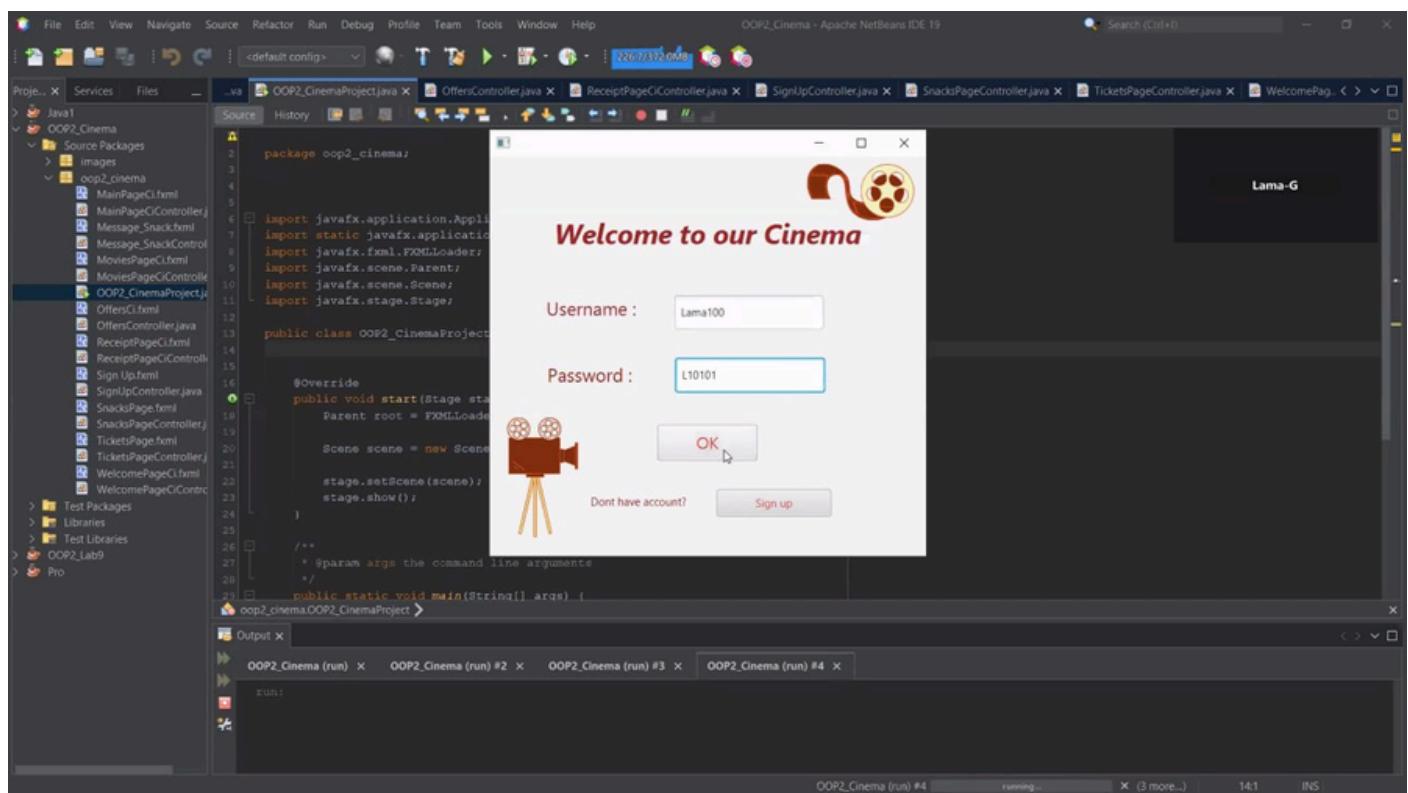

Offers : This section will display the available shows, such as family Offer and others

Movies: This section will display the available movies and through it he will be transferred to the seat selection page

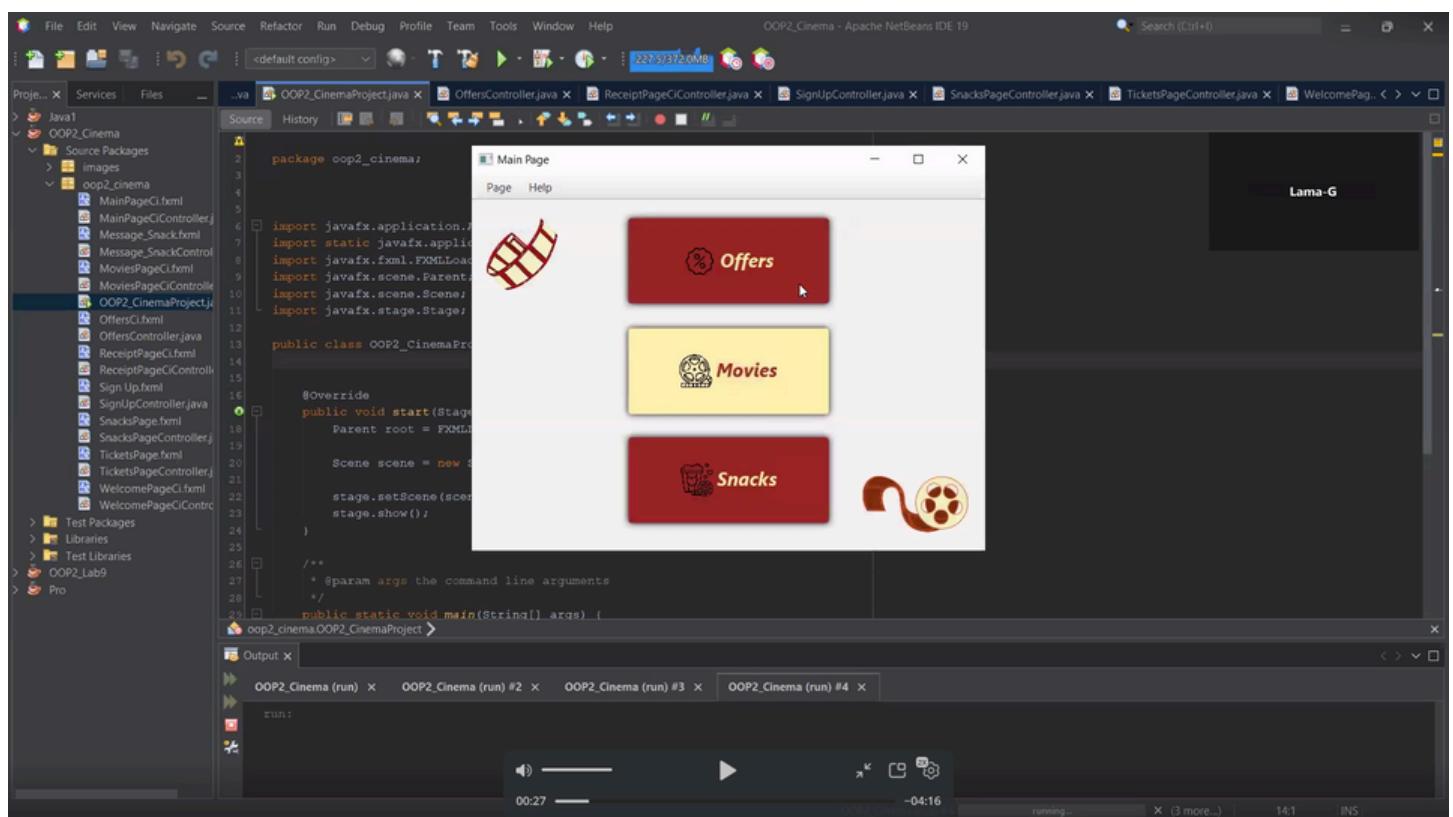

Snacks : This section will enable the user to select the snacks he wants to eat during the movie and then issue the invoice
